Cleared .NET Applications Developer

All successful candidates MUST be a US Citizen and have US security clearance.

Engineering Systems is a GIS consulting firm specializing in Municipal GIS applications with over 16 years of operational experience throughout the U. S. Engineering Systems is expanding and seeks to augment its GIS staff. ES offers unique opportunities for the right person to evolve and mature within the company, working in an exciting and varied environment to produce Enterprise based products for our local government clients.

ES is currently seeking for a full-time job where the developer is able to independently design and implement software solutions meeting customer requirements. Candidate will work closely with senior members of staff to ensure requirements are being met. The ideal candidate will have GIS programming experience, but good analytical skills and a willingness to learn will suffice. Must be able to work in a product focused, highly flexible, team-oriented environment with individual responsibilities for deliverables and schedule.

Required qualifications:

- US CITIZEN & has US security clearance
- Degree in Geography, Life Sciences, Civil Engineering, Computer Science or related field
- 2+ years software development experience
- Programming experience in
 - .Net Developer(s) with C# or C++ experience
 - ESRI ArcGIS, ArcObjects

Preferable:

- Skilled on the ESRI suite of products including web based GIS applications
- Software Engineers-Specifically with IIS experience
- WebLogic Portal Developer(s)
- Java Development Experience
- Service Oriented Architecture (SOA) Expertise
- Senior Web Services Software Engineer(s)

ES offers competitive salaries and benefits.

If you are the type of person who: enjoys a challenge; is willing to travel; absolutely, positively LOVES doing cool things with GIS; thrives on solving problems; works well in a team environment; lives to push your skills and knowledge to the limit; has above average ability to work independently; above average communication skills; ability to interact with clients and coordinate work on-site; we invite you to submit a resume to:

Engineering Systems
