GIS Developer

Engineering Systems is a GIS consulting firm specializing in Municipal GIS applications with over 16 years of operational experience throughout the U. S. Engineering Systems is expanding and seeks to augment its GIS staff. ES offers unique opportunities for the right person to evolve and mature within the company, working in an exciting and varied environment to produce Enterprise based products for our local government clients.

ES is currently searching for a full-time GIS Developer who will perform systems analysis, design, construction, testing and deployment of the solutions into testing and production environments.

Required qualifications:

- Degree in Geography, Life Sciences, Civil Engineering, Computer Science or related field
- 2+ years software development experience
- Programming experience in
 - ESRI ArcIMS
 - ESRI ArcSDE
 - Java
- Oracle or Microsoft SQL

Preferable:

- J2EE, WebLogic, Arc/Info, ArcView, Spatial Analyst, 3D Analyst, ILWIS GIUS, MapInfo, Vertical Mapper, HTML, XML, Unix
- Skilled on the ESRI suite of products including web based GIS applications

ES offers competitive salaries and benefits.

If you are the type of person who: enjoys a challenge; is willing to travel; absolutely, positively LOVES doing cool things with GIS; thrives on solving problems; works well in a team environment; lives to push your skills and knowledge to the limit; has above average ability to work independently; above average communication skills; ability to interact with clients and coordinate work on-site; we invite you to submit a resume to:
